

2

Covered Storage Area

Dry bulk goods are stored under cover or in the open depending on the commodity. A covered facility may also offer secondary services.

1

Rail Access

Cargo dropped onto conveyor belts and moved to storage or vessel.

3

Barge Loading

Barges can be loaded via truck, digger, crane, or conveyor belt system. The equipment determines the speed with which vessels are loaded.

6

Open Storage Area

Trucks are able to unload cargo directly in an open storage area where it can be later repositioned.

5

Barge Unloading

Like loading operations, different methods are available, including grab cranes that scoop out cargo onto a waiting truck or a conveyor belt system.

4

Fleeting Area

Empty and loaded barges are moored in a fleeting area where they wait until they are ready to be filled or transported.
